Horrible Science Comes Out of the Lab and Into the Theatre

Birmingham Stage Company, the creator of the *Horrible Histories* series of plays for primary school children is set to return to TRW with its latest production, **Horrible Science**.

The show covers much of the science curriculum for Key Stage 2 children using talented actors and amazing 3D 'Bogglevision' special effects. Scientific facts, theories and phenomena will be explored and tested during live experiments on stage in a highly visual and entertaining production where children can learn about science without even realising it!

The audience will join Billy Miller, a sceptical 10 year old who battles his way through the **Horrible Science** world to find the answers to questions such as: why do we produce 50,000 litres of spit in a lifetime, and can you fight deadly diseases and beastly bacteria just using orange juice? 'Fatal forces' such as gravity and magnetism and the 'shocking' truth about electricity are also examined, along with how bacteria and microbes inflict their killer diseases and how the different parts of the body fit together.

The show is based on the award-winning **Horrible Science** books by Nick Arnold and illustrated by Tony De Saulles which have sold over 10 million copies worldwide and is suitable for all the family (6+).

"The latest sensation on the theatrical block. The auditorium seemed fit to combust spontaneously in an explosion of joy and excitement!" The Times

ENDS

22 February 2010
